Profile Summary

Computer Engineering graduate and have hands-on experience in engineering full-stack web applications and AI/ML pipelines. Proven capability in designing robust FastAPI backends, responsive React 19 user interfaces, and custom computer vision pipelines. Adept at managing production-oriented systems, database architecture, and containerized deployment across the stack.

Experience

AI/ML Intern – Computer Vision | Stomatobot technologies pvt ltd

Jan 2025 – July 2025 | Pune, India

- Optimized CCTV storage and processing by implementing a **YOLO-based frame-skipping** algorithm, reducing backend processing load by **35%**.
- Processed and analyzed 100+ hours of surveillance footage to develop advanced video summarization and real-time inference logic for smart surveillance prototypes.** Worked extensively in **Linux (Ubuntu Jellyfish OS)** for model training and deployment.
- Developed 10+ production-ready FastAPI APIs for real-time ML model inference and high-throughput backend integration..
- Collaborated within an Agile development lifecycle, utilizing **Git/GitHub** for version control and **Jira** for sprint management across a distributed engineering team.

Projects

- VERO AI – AI-Powered Academic Document Verification System (Final Year In-House College Project | Team Lead & AI Systems Architect)** – Developed a forensic AI software layer that automated credential auditing, **reducing manual processing time by 40%** and Engineered a custom classification engine that significantly enhanced **fraud detection accuracy** across **500+ simulated academic documents..**
- Plant Disease & Pest Prediction System** – Built and fine-tuned a deep learning classification model using **Inception v3**, optimizing preprocessing across a dataset of **5K+ agricultural images** . Developed an interactive React frontend integrated with a **FastAPI backend**, utilizing a **PostgreSQL database** to log agricultural data and display **real-time predictive analytics**.
- Personal Portfolio Website** –Designed and deployed a highly responsive portfolio site using React, achieving 95+ performance scores via component-based architecture, **smooth custom animations**, and **Tailwind CSS**.

Academic Qualification

- Bachelor of Engineering (**Computer Engineering**) **SVPM's COE**, Malegaon (Baramati, Pune) | 2022 – 2026
CGPA: **8.42**
- Higher Secondary Certificate (HSC) – **Dr. D.Y. Patil Junior College, Pimpri** | 2021 – 2022
Percentage: **70.33%**
- Secondary School Certificate (SSC) – **Shri Ramdas Highschool, Belapur** | 2019 – 2020
Percentage: **90.60%**

Technical Skills

- Programming:** Python, C++, Java
- Databases:** MySQL, PostgreSQL, SQL, Redis
- Backend & Model Integration:** FastAPI, REST APIs
- Web Basics (Working Knowledge):** HTML, CSS, React.js, Bootstrap, Tailwind css, Lucid react
- AI/ML & Computer Vision:** OpenCV, NumPy, Pandas, Matplotlib
- Tools & Platforms:** GitHub, Docker, Linux, Jupyter Notebook

Certifications & Achievements

- Professional **RESTful API** Design using **Python Flask** – Alison
- Python for **Data Science, AI & Development** – IBM
- Data Analytics** for Beginners – Google
- Hackathon** Participation – **CMR Hackfest 2.0** (36-hour offline hackathon)

Workshops & Seminars

- AI & ML Workshop** (Offline 2 days) – **IISc Bangalore** (Ethical Edufabrica)
- Advancements in **GPU Programming & Genomics** – Vintech / GPU Community Meetup
- PythonPune Meetup** (Aug 2025) – Red Hat India Pvt. Ltd., Magarpatta Pune
